Former Gov. Andrew Cuomo, Once Disgraced, Now Leads in NYC Dem Primary for Mayor ... But Ranked Choice Voting Makes Winner Less Clear:

SurveyUSA's first polling on the Democratic Primary election for Mayor of New York City shows Andrew Cuomo well ahead of 11 other Democrats, and doing almost well enough in 1st-round ranking, once undecided voters are removed, to win outright, without needing to look at voters' 2nd through 5th choices.

Initially, Cuomo takes 43%, well ahead of State Assemblyman Zohran Mamdani at 11%, former City Comptroller Scott Stringer at 9%, and current Comptroller Brad Lander at 8%. Slightly farther back are City Council Speaker Adrienne Adams at 6% and State Senator Jessica Ramos at 4%. Others poll at 2% or lower, and 12% of likely voters tell SurveyUSA they are undecided.

But: The primary is still a month away, which gives voters plenty of time to learn more about the other candidates in a primary election where finishing first on the first round does not necessarily mean you will be the party's nominee. Cuomo's current major advantage in name recognition may shift over the next few weeks as more ads hit the airwaves and candidate debates take place. While each of the three leading candidates has a positive net favorability score – +29 for Cuomo, +25 for Stringer, +16 for Mamdani – 36% say they haven't heard enough about Mamdani to say, 24% say the same about Stringer, and only 3% say that about Cuomo.

Cuomo leads in 1st-round voting in every demographic group and in every part of the city, ranging from a low of an 11-point lead over Zohran Mamdaniamong both 18 to 34-year-olds and very liberal voters to a high of 54 points among political moderates. Cuomo voters are also, by far, the most likely to say they will not rank 2nd or later choices, with 17% of his voters saying they will not rank a 2nd choice, compared to 4% of Mamdani voters.

Mamdani runs most strongly among very liberal voters, where he takes 22% of first-round votes (compared to 33% for Cuomo) and among progressives, where he takes 18% of the vote (compared to Cuomo's 37%). Among voters who say they are not progressives, Cuomo takes 52%, Mamdani just 2%.

Stringer does best, 14%, among voters earning $80,000 to $120,000 annually, and he is at 13% among white voters, among Democratic primary voters who say they are somewhat conservative, and among those who say they are somewhat liberal.

When voters are asked which one quality is most important to them in the next mayor, the largest group, 24% say a focus on affordable housing and tenant protections. Among those voters, Cuomo leads Mamdani by 16 points. 17% each say the most important quality is "a track record of public service in city or state government" or "strong communication and leadership skills," and Cuomo dominates Stringer, the next highest vote-getter among both those groups of voters, by 54 and 42 points respectively. 12% say the most important quality is experience managing a large city budget, and Cuomo leads Mamdani by 44 points here. 10% say a history of challenging powerful interests is most important, and while Stringer does very well here, taking 18% of the vote, Cuomo takes 41%. Cuomo does much less well on some of the less frequently-selected qualities, leading Lander by 11 points and Stringer by 12 on "strong community engagement in the Asian community and beyond," selected by 5% of voters; edging Mamdani by just 3 points on "new ideas and outsider perspective," chosen by 8%; and tying Mamdani at 20%, with Stringer and Adrienne Adams just behind at 17% and 16% respectively, among the 6% looking for "a progressive record on climate and sustainability."

About the Research/Filtering: SurveyUSA interviewed 1,175 adults from the City of New York 05/14/25 through 05/17/25, using non-probability sample of internet panel members provided by Cint USA. Of the adults, 1,050 were registered to vote; of the registered voters, 580 were identified as registered Democrats. Of the Democrats, 511 were identified as being likely to vote in the Democratic primary election and were asked the substantive questions which follow. The pool of adult respondents was weighted to US Census ACS targets for gender, age, and ethnicity, and to New York State Board of Elections voter registration statistics for Democrats by borough.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
